

**Relay Engineer  
Relay & Power Systems  
Conshohocken**

Rumsey Electric Company has an opening for a Relay Engineer reporting to the Engineering & Field Services Manager based out of our Conshohocken location. This individual will be responsible for designing electrical protective relay schemes and relay/control panels for various utility and industrial applications and configurations.

**Essential Functions:**

- Creating design-basis drawings (relay single lines, schematics, logic diagrams, physical layouts, etc.) from customer specifications
- Developing the Bill of Material for projects
- Estimating and bidding projects
- Participating on project teams as a Lead Engineer
- Take responsibility in testing the design, settings and functionality of protective relays and relay/control panels
- Supervise the testing of protective relay and control schemes/panels in our production facility and at the customer site, if required

**Required Knowledge, Skills & Experience:**

- Bachelor of Science degree in Electrical Engineering (preferably in "Power" or "Protection/Controls")
- Minimum of 2 years experience in substation design and/or protective relay engineering and applications. This experience should include application design, settings calculations and programming and commissioning
- Experience with microprocessor relays such as Areva, SEL, GE, ABB and Basler
- Superior oral and written communication skills
- Well developed skills in computer applications including Microsoft Office (Power Point, Excel, Word, Access, etc.) and utilizing the Internet

**Desired Knowledge, Skills & Experience:**

- AutoCAD and/or Micro-Station CAD experience
- Project management experience
- Field engineering experience
